
INSTALACION DEL ORACLE APEX EN LOCALHOST.

Crear directorio:

C:\apex_salud

SQLPLUS>

//crear el tablaspace para la base de datos..

```
create tablespace appx datafile 'c:\apex_salud\apex.dbf'
size 2000M extent management local segment space management
auto;
```

```
create temporary tablespace temp0_02 tempfile
'c:\apex_salud\temp.dbf' size 2000M;
SQLPLUS> exit
```

>Copiar apex en C:\apex_salud

“Entrar a sqlplus”

```
>sys as sysdba
oracle
```

```
SQLPLUS>@apexins.sql appx appx temp0_02 /i/
```

“Entrar a sqlplus”

```
>sys as sysdba
oracle
```

```
SQLPLUS>@apex_epg_config.sql c:\apex_salud (donde estan los dbf y
lo que hace es crear un directorio de imágenes)
```

```
SQLPLUS>@apxldimg.sql c:\apex_salud
```

```
SQLPLUS>@apxchpwd.sql (cambiar la contraseña)
```

Crear workspaces:

Create Workspace

* Workspace Name ?

Workspace ID ?

Workspace Description ?

CREAR UN ESQUEMA DE BD.

```
SQLPLUS> create tablespace APEX_DEV datafile  
'C:\oracle\app\oracle\oradata\XE\desarrollo.dbf' size  
2000M extent management local segment space management  
auto;
```

```
SQLPLUS> create user eduardo identified by banescoSalud2017  
default tablespace APEX_DEV;
```

```
SQLPLUS> GRANT ALL PRIVILEGES TO EDUARDO;
```

CREAR EL WORKSPACE EN APEX.

Create Workspace

You have requested to provision a new Workspace.

Workspace Information:

| | |
|--------------|---------------------------------------|
| Name | desarrollo |
| Workspace ID | System Assigned |
| Description | Desarrollo de indicadores de salud... |

Administrator Information:

| | |
|-----------|----------------------|
| User Name | EDUARDO |
| E-mail | ejimenmail@gmail.com |

Schema Information:

| | |
|-----------------------|---------|
| Reuse Existing Schema | Yes |
| Schema Name | EDUARDO |

Workspace Created

Workspace desarrollo provisioned with administrator EDUARDO.
